RePLANT®
Operations Management Software

OPERATIONS, COMMERCIAL AND ASSET MANAGEMENT
Software for Renewable Energy Portfolios

www.its-salzgitter.de

RePLANT manages your renewable energy portfolio. Integrate all your wind turbines and photovoltaic installations and make use of one powerful tool for all systems such as SCADA, operations management, commercial and asset management. Do you need to handle electrical meters, power stations and grid infrastructure, too? They're a perfect match for **RePLANT!**

RePLANT Highlights

- ✓ Automatic data acquisition
- ✓ Custom dashboard
- ✓ Real-time control room
- ✓ Custom reporting
- ✓ Powerful billing tool

RePLANT is highly customizeable, modular and it grows with your needs. Manage all your different key accounts and small to large portfolios with just one independent management tool.

RePLANT User Types

- Engineers use **RePLANT** for monitoring, data analysis and documentation including reporting
- Commercial staff do all the billing based on **RePLANT**, such as electricity sales and land lease
- Decision-makers appreciate **RePLANT** for swift portofolio analyses and as a powerful data source for the business development

Data Analyses

Get the best out of your data with **RePLANT's** easy-to-use, highly flexible graphic and numeric evaluations. Compare sets of turbines, manufacturers, portfolios and regions just by dragging and dropping – even for different types of generators like wind turbines or photovoltaic installations.

RePLANT Add-Ons

- Active control
- Authority regulation monitoring
- Mobile access via iOS and Android app
- Paperless inspection via app
- Web portal for easy and efficient customer care

Installation and Support

- We support your **RePLANT** planning and implementation process
- We offer an operating concept that meets your needs – cloud-based, hosting or on-premises
- We offer permanent support and we assure the constant development of **RePLANT**, meeting cutting edge market demands

Your advantages at a glance

- ✓ Monitor and keep track of each generation unit (e.g. wind turbine or solar generator) in one view
- ✓ Simplify your business processes and boost your profits
- ✓ Achieve higher productivity and performance by powerful software automation
- ✓ Gain unrestricted data access to all your data – no unplanned maintenance downtimes or unexpected changes to functionality or to the user interface

Languages

RePLANT is available in English, French and German. More language modules can be supplied easily
